QPE CORPORATION

CUSTOM WIRE HARNESSES & INJECTION MOLDING

WIRE HARNESS CAPABILITIES

With a wide variety of new equipment we have the ability to produce electrical wiring harnesses and electro-mechanical assemblies for a wide variety of customer requirements no matter how simple or complex. We can also provide secondary assembly, soldering, various harness cover protection options, wire printing and first piece samples. We can be your single source supplier. We end of line inspect all of our products to ensure a quality product.

COMPANY OVERVIEW

QPE Corporation (Quality Plastics & Engineering Acquisition Corp) began operations in 2015, carrying on over 30 years of excellence by the former Quality Plastics & Engineering. Our company expertise is injection molded plastics, custom wire harnesses and electro-mechanical assemblies used in a diverse array of markets including automotive, truck/van upfitters, RV, marine, agricultural, medical, public safety, computing and consumer electronics.

COMPANY VALUES

Quality and customer satisfaction is our main concern. We strive to build long lasting customer relationships through honesty, integrity and open communication. Our goal is to provide a quality product that is competitively priced and delivered on time.

ENGINEERING

We utilize AutoDesk Inventor for 3D modeling and AutoCad for 2D prints. We can also provide assistance with your part design and material recommendations.

CAPABILITIES

- Custom harnesses to your specifications
- Discrete wire, multi-conductor & coaxial cable
- Wire-to-wire, wire-to-board, board-to-board
- 32awg to 4/0 capabilities
- Crimpband splicing
- Ultrasonic & resistance welding
- Crimped & soldered terminations
- Circuit identification
- Various protective looms & conduits
- Automated & semi-automated processes
- PPAP & Prototyping services
- IPC/WHMA Class I & II assemblies
- Full electrical testing
- 100% final inspections
